Intended use

This product is for research use only. NOT for use in diagnostic or therapeutic procedures.

This product is tested for use in enzyme-linked immunosorbent assay (ELISA) and immunoprecipitation (IP).

Reagent provided

The antibody is supplied in PBS.

Isotype

Human IgG1κ

Immunogen

Dehydrogenase E1 and transketolase domain containing protein 1. Domain: 45-919 of 919.

Specificity

Specificity has been tested in ELISA (figure 1) and IP-MS.

Purity

Protein A purified.

Disclaimer

The antibody is for R&D use only. NOT for use in diagnostic or therapeutic procedures.

Precautions

1. For professional users.
2. As with any product derived from biological sources, proper handling procedures should be used.
3. The product may be used in different techniques and in combination with different sample types and materials, therefore each individual laboratory should validate the applied test system.

Preparation of the antibody

Use antibody as supplied.

Storage/Stability

Store at -20°C. After first time use, store at 4°C. Avoid repeated freeze-thaw cycles.

Application guidelines

ELISA: 1:1000 – 1:5000

IP: 2 µg/ml

Other applications: since applications vary, optimum working dilution of the product should be determined in the appropriate assay.

Unless the stability in the actual test system has been established, it is recommended to dilute the product immediately before use.

Product Name

Monoclonal Human anti-dehydrogenase E1 and transketolase domain containing protein 1 Immunoglobulin

CAT No.

MQR 2.2401

LOT No.

18285

Quantity

100 µg

Edition: September 4, 2019

Relevance

The 2-oxoglutarate dehydrogenase complex catalyzes the overall conversion of 2-oxoglutarate to succinyl-CoA and CO₂. It contains multiple copies of three enzymatic components: 2-oxoglutarate dehydrogenase (E1), dihydrolipoamide succinyltransferase (E2) and lipoamide dehydrogenase (E3) (By similarity).¹

Figure 1: Specificity of anti-DHTKD1 (MQR2.2401), determined by ELISA. Antibody stock 0.44 mg/ml diluted in PBS containing 0.05% tween-20 and 1% BSA was tested on Dehydrogenase E1 and transketolase domain containing protein 1 (in blue) and non-target protein (in red).
