

Product Name

Monoclonal Human
Anti-WD repeat-containing protein 5 (WDR5)
immunoglobulin

CAT No.

MQR 2.1301

LOT No.

16217

Quantity

100 µg

Edition: May 30, 2017

Intended use

This product is for research use only. NOT for use in diagnostic or therapeutic procedures.

This product is tested for use in enzyme-linked immunosorbent assay (ELISA), immunoprecipitation (IP), and Chromatin immunoprecipitation quantitative real-time PCR (ChIP-qPCR).

Reagent provided

The antibody is supplied in PBS

Isotype

Human IgG1k

Immunogen

Full-length human WD repeat domain 5

Specificity

Specificity has been tested in ELISA (figure 1), IP-MS and ChIP-qPCR.

Purity

Protein A purified.

Precautions

1. For professional users.
2. As with any product derived from biological sources, proper handling procedures should be used.
3. The product may be used in different techniques and in combination with different sample types and materials, therefore each individual laboratory should validate the applied test system.

Preparation of the antibody

Use antibody as supplied.

Storage instructions

Store at -20°C.

Application guidelines

ELISA: 1:5000 – 1:25000

IP: 2 µg/ml

Unless the stability in the actual test system has been established, it is recommended to dilute the product immediately before use.

Relevance

Contributes to histone modification. May position the N-terminus of histone H3 for efficient trimethylation at 'Lys-4'. As part of the MLL1/MLL complex it is involved in methylation and dimethylation at 'Lys-4' of histone H3. H3 'Lys-4' methylation represents a specific tag for epigenetic transcriptional activation. As part of the NSL complex it may be involved in acetylation of nucleosomal histone H4 on several lysine residues. May regulate osteoblasts differentiation.¹

Figure 1: Specificity of WDR5 (MQR2.1301), determined by ELISA. Antibody diluted in PBS containing 0.05% tween-20 and 1% BSA was tested on human WDR5 and BRD4 (non-target).
