

rPEX™ Transient Production of Recombinant Proteins

- Serum-free, suspension-growing **HEK and CHO cells**
- Production of fully post-translationally modified mammalian proteins
- Purification using various chromatographic techniques and optional purification tag removal
- From **microgram** to **gram scale quantities** produced with short turn-around times
- **Highly experienced scientists** dedicated to driving your project to **success**

**FAST, HIGH-QUALITY
RECOMBINANT
PROTEIN PRODUCTION**
